

# Energy performance certificate (EPC)

|  |                           |   |
|--|---------------------------|---|
| Market Cross<br>Fore Street<br>Milverton<br>TAUNTON<br>TA4 1JU | Energy rating<br><b>G</b> | Valid until: <b>1 December 2034</b>                 |
|  |                           | Certificate number: <b>6490-5682-0622-1427-3943</b> |

**Property type** Semi-detached house

**Total floor area** 103 square metres

## Rules on letting this property

### You may not be able to let this property

This property has an energy rating of G. It cannot be let, unless an exemption has been registered. You can read [guidance for landlords on the regulations and exemptions \(https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance\)](https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

Properties can be let if they have an energy rating from A to E. You could make changes to [improve this property's energy rating](#).

## Energy rating and score

This property's energy rating is G. It has the potential to be B.

[See how to improve this property's energy efficiency.](#)

| Score | Energy rating | Current | Potential |
|-------|---------------|---------|-----------|
| 92+   | A             |         |           |
| 81-91 | B             |         | 82 B      |
| 69-80 | C             |         |           |
| 55-68 | D             |         |           |
| 39-54 | E             |         |           |
| 21-38 | F             |         |           |
| 1-20  | G             | 13 G    |           |

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

- the average energy rating is D
- the average energy score is 60

## Breakdown of property's energy performance

### Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

| Feature      | Description   | Rating    |
|--------------|---|-----------|
| Wall         | Granite or whinstone, as built, no insulation (assumed) | Very poor |
| Roof         | Pitched, 100 mm loft insulation                         | Average   |
| Window       | Partial secondary glazing                               | Poor      |
| Main heating | Room heaters, electric                                  | Very poor |

| Feature              | Description                                 | Rating    |
|----------------------|---|-----------|
| Main heating control | No thermostatic control of room temperature | Poor      |
| Hot water            | Electric immersion, standard tariff         | Very poor |
| Lighting             | Low energy lighting in 63% of fixed outlets | Good      |
| Floor                | Solid, no insulation (assumed)              | N/A       |
| Secondary heating    | None  | N/A       |

## Primary energy use

The primary energy use for this property per year is 538 kilowatt hours per square metre (kWh/m<sup>2</sup>).

► [About primary energy use](#)

## Additional information

Additional information about this property:

- Stone walls present, not insulated

## How this affects your energy bills

An average household would need to spend **£4,532 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £3,194 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2024** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

---

## Heating this property

Estimated energy needed in this property is:

- 15,288 kWh per year for heating
- 2,231 kWh per year for hot water

## Impact on the environment

This property's environmental impact rating is F. It has the potential to be D.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO<sub>2</sub>) they produce each year.

# Carbon emissions

|                                      |                 |
|--------------------------------------|-----------------|
| <b>An average household produces</b> | 6 tonnes of CO2 |
|--------------------------------------|-----------------|

---

|                               |                   |
|-------------------------------|-------------------|
| <b>This property produces</b> | 9.4 tonnes of CO2 |
|-------------------------------|-------------------|

---

|   |                   |
|---|-------------------|
| <b>This property's potential production</b> | 3.6 tonnes of CO2 |
|---|-------------------|

---

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

# Steps you could take to save energy

► [Do I need to follow these steps in order?](#)

---

## Step 1: Increase loft insulation to 270 mm

Typical installation cost £100 - £350

---

Typical yearly saving £130

---

Potential rating after completing step 1

15 G

---

## Step 2: Internal wall insulation

Typical installation cost £4,000 - £14,000

---

Typical yearly saving £1,348

---

Potential rating after completing steps 1 and 2

33 F

---

## Step 3: Floor insulation (solid floor)

Typical installation cost £4,000 - £6,000

---

Typical yearly saving £174

---

Potential rating after completing steps 1 to 3

36 F

---

## Step 4: Draught proofing

Typical installation cost £80 - £120

---

Typical yearly saving £55

---

Potential rating after completing steps 1 to 4

38 F

---

## Step 5: High heat retention storage heaters and dual immersion cylinder and dual rate meter

|  |                 |
|--|-----------------|
| Typical installation cost                      | £2,000 - £3,000 |
| Typical yearly saving                          | £1,255          |
| Potential rating after completing steps 1 to 5 | <b>68 D</b>     |

## Step 6: Solar water heating

|  |                 |
|--|-----------------|
| Typical installation cost                      | £4,000 - £6,000 |
| Typical yearly saving                          | £106            |
| Potential rating after completing steps 1 to 6 | <b>70 C</b>     |

## Step 7: Double glazed windows

Replace single glazed windows with low-E double glazed windows

|  |                 |
|--|-----------------|
| Typical installation cost                      | £3,300 - £6,500 |
| Typical yearly saving                          | £125            |
| Potential rating after completing steps 1 to 7 | <b>72 C</b>     |

## Step 8: Solar photovoltaic panels, 2.5 kWp

|  |                 |
|--|-----------------|
| Typical installation cost                      | £3,500 - £5,500 |
| Typical yearly saving                          | £512            |
| Potential rating after completing steps 1 to 8 | <b>82 B</b>     |

## Advice on making energy saving improvements

## Help paying for energy saving improvements

You may be eligible for help with the cost of improvements:

- Heat pumps and biomass boilers: [Boiler Upgrade Scheme](#)
- Help from your energy supplier: [Energy Company Obligation](#)

## Who to contact about this certificate

### Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

|                        |  |
|------------------------|--|
| <b>Assessor's name</b> | Vincent Stokes   |
| <b>Telephone</b>       | 01384471675  |
| <b>Email</b>           | <a href="mailto:epc@legalbricks.co.uk">epc@legalbricks.co.uk</a> |

### Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

|                             |  |
|-----------------------------|--|
| <b>Accreditation scheme</b> | Elmhurst Energy Systems Ltd  |
| <b>Assessor's ID</b>        | EES/018807   |
| <b>Telephone</b>            | 01455 883 250  |
| <b>Email</b>                | <a href="mailto:enquiries@elmhurstenergy.co.uk">enquiries@elmhurstenergy.co.uk</a> |

### About this assessment

|                               |                  |
|-------------------------------|------------------|
| <b>Assessor's declaration</b> | No related party |
